

# PROTOTYPING ACTIVITY

## THE BRIEF

- As a team, quickly prototype a boat using the rough materials you have around you.
- You have 3 sessions of 2 minutes to create different iterations of your boat.
- There will be 1 minute breaks in between to test your boat, and think how it could be improved.

Specification

1. Must hold a lego man without sticking him down
2. Must be made from at least two materials
3. It must float.
